

# EARTHQUAKE: Duck, Cover & Hold

Know how to protect yourself and your family during an earthquake. Practice taking cover and learn the safest places in your home and work. Practice getting out of your home / work place and check to see if the planned exits are clear and if they can become blocked in an earthquake. Practice turning off your electricity and water. Know how to turn off the gas, but do not practice this step. In the event of an earthquake, once you turn off your gas, only your utility should turn it back on for safety reasons.

## Tips

- When in a **HIGH-RISE BUILDING**, move against an interior wall if you are not near a desk or table. Protect your head and neck with your arms. Do not use the elevators.
- When **OUTDOORS**, move to a clear area away from trees, signs, buildings, or downed electrical wires and poles.
- When on a **SIDEWALK NEAR BUILDINGS**, duck into a doorway to protect yourself from falling bricks, glass, plaster and other debris.
- When **DRIVING**, pull over to the side of the road and stop. Avoid overpasses and power lines. Stay inside your vehicle until the shaking stops.
- When in a **CROWDED STORE OR OTHER PUBLIC PLACE**, move away from display shelves containing objects that could fall. Do not rush for the exit.
- When in a **STADIUM OR THEATER**, stay in your seat, get below the level of the back of the seat and cover your head and neck with your arms.

Duck

**DROP** down on the floor.

Cover

Seek **COVER** under sturdy furniture such as a desk, work bench, or interior wall. Protect your head and neck with your arms.

Avoid windows, hanging objects, mirrors or tall furniture.

Hold

If you take cover under a sturdy piece of furniture, **HOLD** on to it and be prepared to move with it. Hold the position until the ground stops shaking and it is safe to move.

## EVACUATE

After shaking, take keys and personal items. Proceed to your buildings designated Emergency Assembly Area (EAA) and follow Building Coordinator (BC) instructions.
