

Rawan Abdulla Al Kubaisy, The 2020-2021 Eltoukhy East-West Gateway Fellow at International House, UC Berkeley

My name is Rawan Al Kubaisy, I am a first year Ph.D. student in Electrical Engineering and Computer Sciences. I grew up in Saudi Arabia but I moved to the United States to pursue my undergraduate education. I earned my bachelor's degree in Electrical Engineering from University of California, Davis in 2019 with emphasis in analog integrated circuits. My research interest lies in developing integrated circuits for biomedical applications. I have been fascinated by the idea of minimizing the size of a large scale system which motivated me to pursue research in integrated circuits.

I hope to meet people from different backgrounds throughout the upcoming year at UC Berkeley and I-House connections. Having been born and raised in Saudi Arabia, I believe I could bring a unique perspective to the community. My non-academic interests include running and reading.

The Eltoukhy East-West Gateway Fellowship was established in 2006 by the Eltoukhy Family Foundation, with the goal of bettering and improving the relationship between East and West, and with the aspiration of furthering increased awareness of the principles and beliefs of Islam and the Moslem peoples.
